PROFESSIONAL SUMMARY

Motivated and self-driven Software Engineering student with hands-on experience in C#, C++, SQL, and Git. Completed over 20 structured programming courses and independently built real-world applications, including a large-scale Driving & Vehicle License Department system and Portfolio Website. Demonstrates exceptional resilience and self-discipline, having continued learning and developing software independently throughout a conflict zone with limited resources. Seeking to bring strong technical foundations, a problem-solving mindset, and a drive to grow into a full-stack software engineering role.

EDUCATION & TRAINING

Full Programming Track (20+ Courses) | *Programming Advices*

February 2025 – Present

Online Academy

- Completed over 20 structured courses from one of the Arab world's largest coding academies (200,000+ student)
- Track covers: C++, C#, OOP, Data Structures, Algorithms, Databases, SQL, Git/GitHub, and Software Engineering principles

C# Masterclass | *tutorials.eu*

December 2024- February 2025

Remote Learning

- Comprehensive C# course covering object-oriented programming, LINQ, and .NET fundamentals
- Strengthened understanding of clean code practices, debugging techniques, and real-world .NET development

Al-Azhar University | *Faculty of Engineering*

September 2023 – October 2023

Gaza, Palestine

- Started bachelor's degree as a Computer Science Student within the Software Engineering program
- Studies interrupted due to the war in Gaza**

IT Foundations Program | *Gaza Sky Geeks*

June 2023 - September 2023

Gaza, Palestine

- Successfully Completed Intensive foundational IT and Software Development Program
- Program covered programming logic, computer science fundamentals, and professional development skills using python
- Served as a peer teaching assistant, supporting classmates with project completion and supplementary learning

PROJECTS

Portfolio Website | *Personal Project*

April 2026 - Present

- Built and deployed a production-ready personal portfolio using **vanilla HTML, CSS, and JavaScript** with a data-driven architecture — all content managed through a single **data.json** file
- Implemented **SEO best practices** (Open Graph, JSON-LD structured data, sitemap), **security headers** (HSTS, X-Frame-Options, CSP), and **accessibility standards** (ARIA, focus management, reduced-motion support), deployed on Vercel

Driving & Vehicle License Department System (DVLD) | *Personal Project*

December 2025 – May 2026

- Developed a large-scale desktop application simulating a full government Driving & Vehicle License Department (DVLD) system using **C#, SQL, and 3-Tier Architecture**, with **200+ commits** on [GitHub](https://github.com) demonstrating consistent, professional development practice
- Built 15+ screens** across core modules including license issuance, renewals, driver records, and people management backed by **14+ relational database tables** and **50+ service and data-access classes**
- Demonstrating professional-level software architecture, clean code principles and full database integration

LEADERSHIP

Athletics Team Leader | *Rafah's Youth Club*

May 2022- September 2023

Gaza Strip, Palestine

- Led and coached the city's football team, managing training sessions, team coordination, and player development

Student Government President | *UNRWA Schools*

September 2021- May 2023

Gaza Strip, Palestine

- Elected to represent a student body of 150,000+ students across UNRWA schools in the Gaza Strip
- Collaborated with UNRWA leadership and school administrators to advocate for improvements to educational systems, facilities, and student welfare programs

SKILLS

Technical Skills: C#, C++, SQL Server, Html, CSS, Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving,

3-Tier Architecture, Clean Architecture, Asynchronous Programming, Application Deployment (Vercel), Git, GitHub, AI

Languages: Arabic (Native Fluency), English (Proficient)
